

Vehicle Antenna from 2000MHz to 6000MHz

WD26M

The WD26M is an wideband, compact and low-profile vehicle antenna that is well suited for communication, monitoring and jamming applications within the 2000 – 6000 MHz frequency range.

- Excellent performance over the entire frequency range
- High power rating, 80W at 100% duty cycle

Product details*	
Frequency range	2000 – 6000 MHz
Polarization	Nominally vertical
Antenna type	Dipole
Radiation pattern	Omni-Directional
VSWR	≤ 3.0
Nominal Impedance	50 Ω
Power rating	80 W (CW)
Standard color	Black
Radiator	Plastic radome protected
Height	220 mm
Radiator diameter	44 mm
Weight	700 g

Installation*	
RF connection	Female N-type
Mounting	4-hole US and 3/6-hole NATO pattern mount

*Specific adjustments on request

Order number	
WD26M	Antenna as described above
